Al Baki for General Supplies, Import & Export

2024

About the factory

The factory is located in the city of Suez in the Ataka industrial area. It has been equipped with the latest equipment and the highest technology. The factory is unique in its production of many chemicals, to be the only one in the Middle East that produces parts, fusing aid and accelerator. The total capacity of the factory is thirty-six thousand tons annually of chemicals. Our goal is to provide a national industry with Egyptian hands of international quality. We look forward to being the leaders in the field of chemical industries in the Middle East. We have a team of chemistry experts to produce the best products that are used in the industries of cement, concrete, detergents, tanning, leather printing and many other industries.

Values

**Integrity-
innovation
responsibility-
sustainability-
credibility-
group work**

Vision

**To be the first
choice in chemical
manufacturing
solutions**

Message

Compete globally by providing materials needed by the local market with high quality and reasonable price

Why Elbaki?

Innovation

It's the way the factory works Weeping in the production of chemicals Where we seek in chemical treatments To choose the best manufacturing methods and means And benefit from local raw materials To achieve ideal results and achieve sustainability Reducing the cost and quality of production for customers

After sales

Our goal is to build communication Effective with our clients And a lasting partnership

work team

Selection and development Our team depends on Efficiency and commitment

the quality

We strive to provide Top quality In the Middle East

Transport

Weeping factory Integrated delivery service For chemicals

Strength Enhancer

uses

- Raising the quality and hardness of cement.
- Improve the cohesion speed.
- Increase the ease of use and configuration.

Amount: 1 kilo per ton

Companies that use our products

ARABIAN CEMENT
العربية للأسمنت

Flux Agent

uses

It consists of fluoride additives, and is used as an adjunct fusion in the production of gray cement, as it reduces Melting point to facilitate the production process.

Sodium Aluminate

uses

- _It is used as a cement accelerator for concrete
- _It is used by major cement companies
- _It is used in concrete plants

They hold ISO certificates

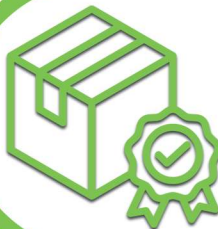

Calcium Fluoride

uses

Calcium fluoride is used in the production of white cement as a refractory agent, it lowers the melting point and increases the brightness of the white color
